the anti-trust campagne of microsoft is a damn shit.it is unbelivabel why microsoft think the people would trust a company whose company-politic is only spying, lying and changing results of studies. with their anti-trust campagne they make it only more worst.

ps: what the fuck do u think should mean: "americans for technology leadership"! the usa-flag is not the symbol for every country on america! the people who live in mexiko, kanada, peru, brasil, etc. are also americans!
